# Gokul R

Aspiring Software Engineer | Full-Stack & AI/ML Development

Chennai, India | +91 9942585985 | gokulra2006@gmail.com

**github.com/gokulra2006-del** | LinkedIn

**Target Roles:** Software Engineering Intern | Full-Stack Developer Intern | AI/ML Intern | Cybersecurity & SOC Intern

## Summary

B.Tech CSE undergraduate (VIT Chennai, Class of 2028) with hands-on experience building full-stack and AI-integrated systems, including an LLM-powered ERP platform and an in-progress ML-based SOC threat-detection system. Proficient in React, Node.js, MongoDB, REST API design, and applied machine learning. Seeking a Software Engineering internship to build scalable, secure, production-grade systems. Full project portfolio and source code available at **github.com/gokulra2006-del**.

## Education

Expected May 2028 — B.Tech, Computer Science and Engineering, **Vellore Institute of Technology (VIT), Chennai** (CGPA: 8.03/10)

**Relevant Coursework:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering, Artificial Intelligence, Web Technologies

## Technical Skills

| | |
|---|---|
| Languages | Java, C++, Python, JavaScript, SQL |
| Full-Stack Development | React.js, Node.js, Express.js, Tailwind CSS, REST APIs, JWT Authentication, RBAC |
| Databases | MongoDB, MySQL |
| AI / ML | LLM API Integration, OpenRouter (multi-model access), Applied Machine Learning, Anomaly & Object Detection |
| Cybersecurity & Cloud | SOC Fundamentals, Threat Detection & Incident Response, Networking Fundamentals, AWS (in progress) |
| Tools & Platforms | Git, GitHub, Postman, VS Code, GitHub Copilot, Claude, Antigravity |
| Core Competencies | System Design Fundamentals, API Development, Authentication & Authorization, Database Design, Agile Collaboration, Version Control, Cloud Fundamentals, ML Fundamentals |

## Projects — Full portfolio: github.com/gokulra2006-del

**AI-Powered College ERP – Friday AI Integration** gokulra2006-del/Ai-Learning-Platform

- *Stack: React.js · Node.js · Express.js · MongoDB · LLM APIs via OpenRouter*
- Architected a full-stack ERP platform for 3 user roles (student, faculty, admin) with JWT-based authentication, RBAC, attendance management, and dashboard analytics.
- Designed and built a suite of RESTful APIs and MongoDB schemas powering real-time attendance tracking and academic data workflows across all three roles.
- Integrated "Friday AI," a custom LLM-powered assistant via OpenRouter, delivering natural-language academic support, attendance insights, and in-app navigation.

**Sentinel-AI – AI-Powered SOC Platform (In Progress)** gokulra2006-del/Sentinel-ai

– *Stack: React.js · Node.js · Express.js · MongoDB · Python · Machine Learning*
– Building an AI-driven SOC platform for real-time threat detection, applying ML-based anomaly and object detection to flag suspicious activity.
– Designing security-event dashboards, alerting, and incident-reporting workflows, applying networking fundamentals to log and event ingestion pipelines.

**AI Code Review Assistant – codereview-ai** gokulra2006-del/codereview-ai
– *Stack: React.js · Node.js · Express.js · LLM APIs via OpenRouter*
– Built a full-stack tool that statically analyzes source code and generates LLM-driven improvement suggestions through OpenRouter-routed APIs.
– Designed a live, interactive review interface enabling developers to receive real-time, AI-generated code-quality feedback.

*Additional Projects (see GitHub for full list):*

– **Organic Store** – Full-stack e-commerce platform (React, Node.js, Express, MongoDB) with authentication, cart, and order management; optimized MongoDB queries for faster product search.
– **Alert-System** – Campus-wide alert system (TypeScript) broadcasting real-time safety and emergency notifications to students, faculty, and staff.

## Experience

**Full Stack Web Development Intern – Incrix Techlutions LLP** May 2026 – Jul 2026
– Developed and shipped responsive full-stack web applications using React.js, Node.js, Express.js, and MongoDB.
– Designed and integrated RESTful APIs and implemented authentication and CRUD operations supporting core application features.
– Collaborated with a development team via Git/GitHub, following software engineering best practices for code review and version control.

## Achievements

– Secured 2nd Place at the HackWarys Hackathon.
– Actively participate in AI, full-stack, and cybersecurity hackathons; maintain 5+ public GitHub repositories of production-style projects at github.com/gokulra2006-del.
